

2021 Global Investor Statement to Governments on the Climate Crisis

This statement, coordinated by the seven Founding Partners of [The Investor Agenda](#), is signed by 733 investors representing over USD \$52 trillion in assets

We stand at the beginning of a pivotal decade in which institutional investors and government leaders worldwide have the power to raise ambition and accelerate action to tackle the climate crisis. If we do not meet this challenge and change course immediately, the world could heat in excess of 3-degrees Celsius this century¹ – far beyond the goal of the Paris Agreement to limit the global average temperature rise to no more than 1.5-degrees Celsius, which scientists say is necessary to avoid the worst impacts of climate change.

To achieve this common goal, we must work together to reduce global net carbon dioxide emissions by 45 percent from 2010 levels by 2030², with a dramatic reduction of all greenhouse gas emissions essential for reaching net-zero emissions by 2050 or sooner. Key to this is ensuring net-zero emissions.

As the world prepares to gather for the 26th United Nations Climate Change Conference of Determined Contributions (NDCs) for 2030 and to ensure a planned transition to net-zero respective capabilities of countries, we believe that those who set ambitious targets in line with achieving net-zero emissions, and implement consistent national climate policies in the short-to-medium term, will become increasingly attractive investment destinations. Countries

In this shared global crisis, investors and governments each have a responsibility to act swiftly and boldly. Investors are taking climate action in line with The Investor Agenda, with more investors than ever before embedding net zero goals and strategies into their portfolio decisions, engaging companies to cut their emissions and calling on policymakers to deliver robust climate action. Investors are urgently seeking to decrease their exposure to climate risk as a core emissions economy.

However, our ability to properly allocate the trillions of dollars needed to support the net-zero transition is limited by the ambition gap between current government commitments (as set out in NDCs) and the emission reductions needed to limit global average temperature rise to 1.5-degrees Celsius. In addition, as owners of (or those representing owners of) companies, we need access to adequate information on how these companies are assessing and managing the risks and opportunities presented by climate change. Government policy has a critical role

¹ <https://www.unenvironment.org/emissions-gap-report-2020>

² <https://www.ipcc.ch/2018/10/08/summary-for-policymakers-of-ipcc-special-report-on-global-warming-of-1-5c-approved-by-governments/>

These gaps – in climate ambition, policy action and risk disclosure - need to be addressed with urgency.

We, therefore, call on all governments in 2021 to:

- 1.
